

Model PSW120 series

Mechanical pressure switch
0.2 bar to 400 bar
Mass production

Materontek
Sensing and Internet of Things

The inner piston is connected with the precision spring. When the pressure changes, the spring extension and shrinkage will change correspondingly. When the pressure reaches the set value, the preset mechanical structure will be triggered and a switch signal will be sent.

- ❑ Mechanical Pressure Switches
- ❑ Repeatability: $\pm 3\%$ FS
- ❑ Pressure range: 0.2 bar...400 bar
- ❑ Overload limit: max.600 bar

Application

- ❑ Industrial automation system
- ❑ Process control
